

## Addendum to NMTC Coalition 10<sup>th</sup> Anniversary Report

January 2011

#### Key Finding:

- The vast majority of NMTC investments (89.5%, or \$13.8 billion) have been made in communities with at least one factor of higher economic distress than required by law.

Data released by the CDFI Fund and provided by Community Development Entities (CDEs) identified whether unemployment rates exceeded the national average, whether median income was less than 60% and whether poverty rates were greater than 30% for each NMTC transaction. Our research confirms that of the 2,958 projects financed through 2009 with NMTC, 2,605 were located in places with at least one factor of economic distress. Overall, more than 1,000 projects were financed with the Credit in places with median income was less than 60% and poverty rates were greater than 30%; and 1,329 businesses were financed with NMTC in places where unemployment exceeded the national average.
